

Says Pe-ru-na Is a Good Medicine.

Hon. C. C. Brooks, Mayor of Sunbury, Pa., also Attorney for Farmers' Bank and Sunbury Building and Loan Co., writes:

"I have the utmost confidence in the value of Pe-ru-na. It is a great medicine, have used it and I have known many friends who have obtained beneficial results from its use. I cannot praise Pe-ru-na too highly."

HON. C. C. BROOKS.

There are a host of petty ailments which are the direct result of the weather. This is more true of the excessive heat of summer and the intense cold of winter, but is partly true of all seasons of the year.

Whether it be a cold or a cough, catarrh of the head or bowel complaint, whether the liver be affected or the kidneys, the cause is very liable to be the same. The weather slightly deranges the mucous membranes of the organs and the result is some functional disease.

Pe-ru-na has become a standby in thousands of homes for minor ailments of this sort.

Ask Your Druggist for Free Pe-ru-na Almanac for 1907.

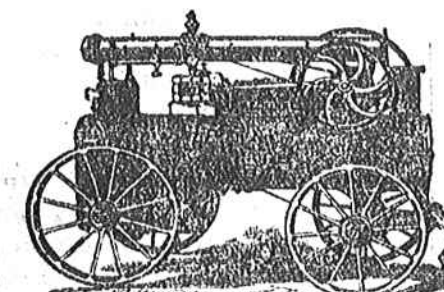

Sea Superstition.

All the old seadogs at League City, Tex., agree that the new battleship Tennessee is destined to experience some misfortune. When the commission pennant was unfurled the commission pennant was unfurled on the Tennessee, instead of floating out in a long, narrow streamer, it wrapped itself around the mast, and continued to do so every time it was unwrapped. The sailors say that this happens rarely, but when it does it forebodes evil. When the battleship Missouri, on which the disastrous turret explosion occurred, went into commission her pennant did the same thing. Philadelphia Record.

Hogless Lard

None anywhere near so good, so pure, so economical, so satisfactory. U. S. Government Inspected.

You Feel Well
when your stomach takes proper care of the food you eat.
Parsons' Pills
aid digestion, gently expel all refuse matter from the system—make new rich blood and insure health. Put up in glass vials. Price 25 Cents. At all dealers. L. S. JOHNSON & CO., Boston, Mass.

Valuable Wood Used in Mexican Structure for Pedestrians and Teams.

As mahogany is among the most costly woods in the world, it may well be inferred that this tropical material is not very extensively employed in the construction of buildings, etc. A bridge constructed of solid mahogany is certainly a rarity, a curiosity. There is one, claimed to be the only one in the world, built of that material. This structure is located in the Department of Palenque, State of Chiapas, Republic of Mexico. This district lies in the extreme southwestern part of Mexico, near the boundary line of Guatemala.

This mahogany bridge is constructed entirely of that valuable wood except some iron supports, braces and nails that are necessary. The bridge spans the Rio Michol and its total length, including approach, exceeds 150 feet, while the width is 15 feet. It is used by both teams and pedestrians and, though somewhat rude and primitive in construction, it is very substantial.

None of the timbers of the flooring were sawed for in that region there are no sawmills, but were hewn and split.

In that section of old Mexico there are several very large rubber plantations and mahogany trees are quite common. In clearing away the tropical trees the mahogany growths are also cut down and removed. As this wood is quite abundant, some of it was used in building the bridge. From the American Inventor.

PECULIARLY FITTED.

"Now," said Hannigan, after the accident, "we'll have to send some man to break the news gradual to the poor man's wife."

"Send Hannigan," suggested Finnegan. "He's just the man to break the news gradual—the stammers so." Philadelphia Ledger.

Estimates of the country's copper production this year place the output at between 940,000,000 and 970,000,000 pounds. Last year's production was 901,000,000 pounds.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from one drop to one teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case that fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & CO., Toledo, O.

Sole Druggists, 75c.

Take Hall's Family Pills for constipation.

The sea-level canal from Mar-seilles to the Rhine River is to be completed in seven years at a cost of \$13,730,000.

Invigorate the Digestion.

To invigorate the digestion and stimulate the liver and bowels there's nothing so good as that old family remedy, Brandreth's Pills, which has been in use for over a century. They cleanse the blood and impart new vigor to the body. One or two every night for a week will usually be all that is required. For Constipation or Dyspepsia, one or two taken every night will in a short time afford great relief.

Brandreth's Pills are the same fine laxative tonic pill your grandparents used and being purely vegetable are adapted to every system.

Sold in every drug and medicine store, either plain or sugar-coated.

Every time a girl is crossed in love she imagines that her heart is broken, but it only gets a very small dent.

Mrs. Winslow's Soothing Syrup for Children (coughing, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle)

Some people's goodness is probably due to the fact that they are never found out.

Itch cured in 30 minutes by Woolford's Sanitary Lotion; never fails. Sold by Druggists. Mail orders promptly filled by Dr. E. Detchen Med. Co., Crawfordsville, Ind. \$1.

THE MODERN ELECTRIC KITCHEN OUTFIT.

Not only has man utilized electricity in his greatest activities as a manufacturing agent or as a means of transportation, but he has chained down the electric fluid to the more humble but almost equally important task of simplifying the management of his home. An idea of the spread of this use of electricity considerably beyond that possessed by the average housewife is given by H. L. Knowlton in Cassier's Magazine.

A Useful Toy.

Very little difficulty will be encountered in making the water-clock illustrated here; and any boy can manage. All that are needed are a piece of cardboard, a piece of wire, two pieces of cork, some needles and a tin can.

A hole is made in the bottom of the can which shall suffice to let all the water run out in twenty-four hours. The piece of cardboard must be about twenty-six inches long and six inches wide, and is cut out as shown in the diagram. This is set up on the tin can by means of wires.

A stiff wire twenty inches long has a small piece of cork fastened to one end, and a shaving of cork at the other, this last piece of cork to float in the water of the can, which is to be open at the top. The bit of cork at the top, which is to act as a pointer, can also help to steady the wire by having two needles inserted so that they will move up and down in the groove, being fixed crosswise.

One of the needles will thus serve as a pointer; and to mark out the hours on the cardboard one simply lets the water run out for an hour from the opening at the bottom, and going to the card, makes a mark; the other hours are determined in the same way.

What We Drink and Smoke.

Beer, whisky and tobacco have been consumed so freely that the internal revenue for the last fiscal year ran about \$15,000,000 above that of the year before and \$8,000,000 above the estimates made last fall, when one-third of the year had passed. During the first quarter of the current fiscal year the receipts went more than \$4,500,000 above those of the corresponding quarter in the last year, and the Commissioner estimates that, although the tax is about to be removed from alcohol used in the arts, the total internal revenue collections in the present year will rise to \$200,000,000, an increase of \$10,000,000 over the last year. Philadelphia Record.

Hog of Brilliant Color.

That really beautiful species the Red River hog of West Africa is now well represented in the zoo. In common with other juvenile wild pigs the Red River hog is striped in the early part of its life. When about three months old it loses its markings and the body has a spotted appearance.

The adult is one of the most brilliantly colored mammals in existence, but its bright red hue no doubt harmonizes with its surroundings, the soil in many parts of West Africa being red. It is of an elegant shape and with its tufted tail and long, pencilled ears has considerable pretensions to beauty.

Though it has not the enormous tusks found in many of the wild swine the Red River hog is not devoid of means of defense. Its face is protected by hard callosities on each side, just below the eyes, and there is a bony ridge on each side of the upper jaw. And that these growths are not merely ornamental is proved by the fact that this animal can hold its own with the wart hog, a species provided with formidable upturned tusks. Westminster Gazette.

Charming Roumanian Costume.

The Roumanian peasants have the most delightful and picturesque costumes of all European peoples. The above shows the national costume with headdress.

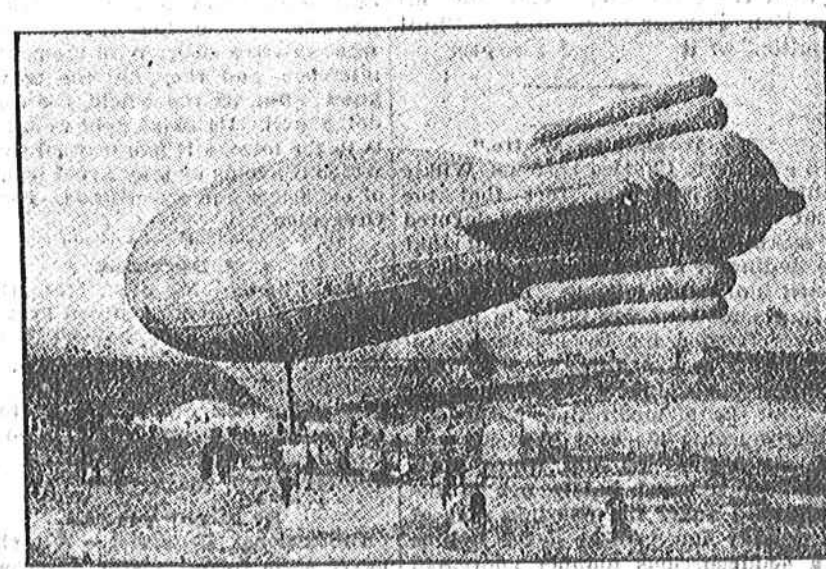

Where England Leads.

The average yield of wheat per acre in England far exceeds that of any other in the world—with perhaps one exception, Denmark. Mill-tr.

Among men, fifty-one per cent. are stronger in the right arm than in the left. In thirty-three cases the left arm is the stronger; in the rest the two arms are equal.

Kleptomania is the highest type of the art of stealing.

Latest and Largest Dirigible Balloon.

THE NEW DEUTSCH AIRSHIP "VILLE DE PARIS."

The peculiar arrangement of twin, hydrogen-filled cylinders forms a sort of balancing tail. The balloon is 203.42 feet long and 34.45 feet in diameter. It has a capacity of 112,005 cubic feet and requires a seventy-horsepower gasoling motor connected to a 19.58-foot propeller to drive it through the air.

Woman's Realm

Children That "Toe In."

The number of growing children in New York, particularly girls, who "toe in" as they walk is astonishing. Grace and firmness of tread is impossible to these unfortunates. They lose balance and strength. What a parents thinking of who permit the awkwardness to develop and continue?—Alden, in the New York World.

Calls Americans Slouchy.

Professor J. Laurence Laughlin, of the Political Economy Department in the University of Chicago, switched over into taste and dress in a speech. Said he:

"The Americans are living too much in a state of slouchiness in dress, manner, study, intellect and language. What we need is a sense of form. It is something that is very scarce among American people; it is the rarest sense there is in this country."

"Just look at the way women walk on the street and stage. The wiggling, swaying movements have made them the victims of Europe. English, French and German women walk with some dignity, but the young American women have a glide and wiggle that is graceful and undignified."

Beauty by Proper Breathing.

If you want to be fully developed, with an easy grace of motion that tells of the perfect control of every muscle, then take to rhythmic breathing. It will make a new woman of you. The hollows in your cheeks and your neck will fill up as if by magic. The increasing heaviness of your walk will disappear. You will acquire a complete command of your body.

Any flabbiness or angularity comes from breathing with only the upper part of one's lungs. Double chins and other deformities are due to the same causes.

A clever lady doctor advocates the corset, though she deprecates tight lacing, says Woman's Life. She believes the support helps to educate the muscles. Support where it is needed, no constriction, good food, plenty of fresh air and a complete understanding of how to breathe properly would result in something very nearly approaching absolute physical perfection.

Parents Should Guard Age.

Love, faith and confidence be developed and made permanent every home. It is a sad day when a child loses faith and confidence in father or mother, and when he can point to the time when he was disappointed and deceived by those in whom, above all others, he trusted.

Children naturally believe that what father and mother say and do are right and true, and no parent can afford to forfeit such implicit trust. Parents should zealously guard their words and actions in this respect, and by so doing they will be able to exert a healthy moral influence which will be to their children in after years a safeguard against impending disaster, says Woman's Life.

As early as a child can understand anything, his first impressions of his parents should be a trustful confidence, which in time will grow into filial love and respect. This is the secret of his future self-control and the power by which parents can exert an influence which shall determine very largely the physical, mental, moral and spiritual character of their child.

Woman's Status in France.

There is still in every Frenchman a great deal of the Oriental way of looking at a woman.

And the French wife knows it, but she goes on helping her "nian," he she duchess or midnotte. She will forgive again and again; she will let him squander her dot, and will learn how to do with fewer frocks (the delight of every Frenchwoman) in an ever-pitiful attempt to patch up the fortune and happiness he has wrecked. If she happen to be a shopman's wife, he needs no bookkeeper or manager; she will be there from morning till night, the slave of the ledger, careful of every centime; while he too often will leave the heavier part of the business in her capable hands and turn his attention to a domino party at the nearest cafe. If she be a peasant's wife, no one on the farm will slave harder than she. There is scarcely any labor which she will not undertake.

In every sphere woman is too often the man of the house. Nowhere is feminine influence more active, more felt and less recognized than in France. And nowhere among the civilized nations is man more dependent on woman, more attached to her and less respectful. London Mail.

Women Are Dizzy With Independence.

"The woman suffrage movement in America is either sleeping or taking an indefinite rest, so far as I am able to see. I am discouraged and disappointed."

These were the words of Lady Cook, the wealthy leader of the English "suffragettes," or Woman's

Rights party in Great Britain, as prepared to return to London after a week's investigation, from her point of view, in this country.

Lady Cook and her sister, Violet, who is also a suffragette, had been in America for a week, and had been to many of the suffrage meetings.

"They seem to be satisfied that they have all the rights of the brothers save the ballot, which they denied them under penalty of law; social ostracism a quarter of a century ago. "Women appear to be almost disinterested in the independence of pleasure they now enjoy because of the prosperity sweeping over the great nations of the world. They seem to be bent on enjoyment, and the serious thinking and work done by the women of the pioneer reform movements are much less noticeable to-day."

"I have investigated the movement in this country, and am convinced it has no leader, no spirit, and there is no incentive to work."

"Remember," continued Lady Cook, "I do not blame our women for enjoying their independence, escort, and independence of livelihood to the fullest, for it is so far as to still be most attractive."

"Only the last time I visited New York, a few years ago, I was pelted to call in my coachman to lunch with me in a well-known Broadway cafe, because ladies escorted were denied food there. Many ways American women are better off and more adequately protected by laws than the English women."

"But you should just see what the women are doing in England," said Lady Cook, enthusiastically.

"You will notice I wear no jewelry."

unanimously for suffrage, and I am sure you are going to get it. "The English women are tired of being fooled. The men told the last year that if they could control the labor vote they would grant the suffrage."

"When the women this fall put matter up to certain members of Parliament who had professed a sincerity of interest, the men would listen to them, but if approached the subject would say snavely, 'We are come out on the terrace and have a cup of tea?'"

"The women are tired of tea, weary of promises. They want men to do the right thing by them now."—New York Journal.

Sex Question in Germany.

An eminent German statistic foresees a serious woman famine that empire if the male population continues to increase at its present rate.

At present there are several thousand more women than men in Germany, but the latter are increasing at a rapid rate. In forty years, it is estimated, the sexes will be equal in number, but in a hundred years there will be 2,000,000 more men than women in the empire.

It is obvious that Germany's freedom from devastating wars, having its natural effect. It is curious fact that the maintenance of an equality of sexes in any country must be predicated upon occasional wars, which keep down the surplus male population.

But the German prophet is necessarily alarmed. The equality of sexes has been maintained since the beginning of time and will continue to be. It is one of nature's marvels, unexplained by the leaping sociologists and defiant of cold statistics.

Doctrinaires like Malthus have progressed the ability to provide increased population grows. By the nations that are now crowded can with intensive agriculture support vastly greater populations than they are doing.

One reason why Germany's population is increasing, besides the absence of wars, is that for several years emigration has been checked by stringent Government measures.

It is logical and natural that emigration would again revive if there were any real danger of an unnatural parity between the sexes.—Chicago Journal.
